

Water and Irrigation System Rehabilitation

We have fully rehabilitated Trav Kod water reservoir, about 1,200,000 m³ capacity to store water for farming in both dry and wet season serving about 7000 people in Ballangk commune, Prasat Bakong district, Siem Reap province. at the same time, we have built about 18 km of irrigation canals in the areas.

We would like to thanks to WWF/UNDP/EWB/AUSAID who help us to make it materialized.

Detail on any previous work (across sectors) CP has conducted in partnership with WFP.

In partnership with and support from WFP, CTO has successfully implemented Trav Kod's Canal Rehabilitation Project in 2009-2010 (first section of the irrigation canal). The project started in October 2009 and completed in August 2010. There were 216 participants including 81 women. The project has supported food shortage families of 143 families equal to 767 people including children. The project works on:

- Construction of 2000 m of sub irrigation canal
- Construction of 50 community families fish ponds

The total amount of rice (FFW) released to participants is 22750 Kgs.

- Detail on experience of CP in implementing other non-WFP FFW-type projects. (This can be provided in list form and should include amount of funding received and identification of any partners/donors).

CTO has implemented a numbers of non-WFP FFW-type projects including construction of water reservoir, families fish ponds, community forestry, community fishery, community eco tourism and

natural resources management. The following are project has been implemented by CTO and its funding partners:
